

Task Lead Washington, DC

Description: Novonics Corporation is seeking highly motivated individuals to provide technical leadership, direction, planning and oversight in the management and administration of task orders issued by FAA customers.

Tasking:

- Serve as the Contractor's expert responsible for technical leadership, direction, strategic and tactical planning, and oversight in the management and administration of task orders by the FAA customers.
- Ensure work requested under the task order is performed properly to the complete satisfaction of the customer.
- Responsible for technical performance of all WBS area products and services and for ensuring cost, schedule and programmatic objectives are met within budget and schedule constraints.
- Establish policies, procedures and goals for successful completion of work within the task order and ensure that policies and procedures are effectively carried out.

Education:

Must have a Bachelor's Degree in an applicable field of study and 15 years experience, OR a Masters Degree and 10 years experience OR 25 years of relevant experience.

Experience/Knowledge:

- Requires frequent interface with FAA personnel, other contractors, FAA technical POCs, and FAA customer representatives.
- Requires sound working knowledge of FAA Acquisition Management System and commercial acquisition practices.
- Responsible for staffing, personnel management, review and approval of technical products, expenditures, and direct support of the customer.
- FAA experience desired.

Travel: Some travel may be required.
